# DATA ANALYTICS & ENGINEERING

Consultant at **Ernst & Young (EY)** specializing in high-throughput distributed pipelines, governed cloud lakehouses, and enterprise Generative AI. Transforming complex ERP streams into production intelligence.

**+3** YEARS OF EXPERIENCE

PYSPARK, SAP ERP, BENFORD RISK

## DISTRIBUTED RISK & EXCEPTION ENGINES

SNOWFLAKE, DBT, DELTA LAKE

## GOVERNED LAKEHOUSE & DBT MARTS

# PROJECT EXPERIENCE

SYSTEM 01 • PySpark & Distributed

## Distributed ERP Exception-Detection Engine

High-Throughput Risk & Anomaly Mining for Manufacturing Audit

Engineered scalable, parameterized PySpark pipelines across automotive and agro-chemical manufacturing domains. Encoded complex audit and risk algorithms—including Three-Way Matching, Segregation of Duties (SoD) conflicts, and Benford's Law anomaly detection—with embedded end-to-end data integrity checks.

**14.2x Faster** Data Processing Speed

**45M+ Tx/Run** ERP Record Volume

PySpark SAP / Oracle ERP Data Quality Risk Analytics

SYSTEM 02 • GenAI & RAG

## Enterprise Audit RAG Pipeline

Automated Key Risk Indicator (KRI) Extraction from Complex PDFs

Built a Retrieval-Augmented Generation (RAG) workflow for PDF-based audit report analysis, automating the extraction of Key Risk Indicators (KRIs) from unstructured documentation into structured, queryable outputs.

**85% Reduction** Document Review Velocity

**98.4%** KRI Extraction Precision

LangChain FAISS Azure OpenAI Python

SYSTEM 03 • Snowflake & dbt

## Global Manufacturing KPI & Incremental dbt Architecture

Warehouse Scaling & Elimination of Cross-Join Query Bottlenecks

Built high-scale Snowflake/dbt pipelines computing financial and operational KPIs (inventory ageing, CEBITDA, revenue). Resolved recurring cross-join timeout bottlenecks using incremental dbt models and scheduled backfills.

**-62% Warehouse Credits** Query Compute Cost

Snowflake dbt SAP Data

**3.5h → 18min** Execution Runtime

SQL

SYSTEM 04 • Snowflake & dbt

## Pharma CMC Governed Data Modeling

Audit-Proof Pharmaceutical Chemistry & Controls Transformation

Developed and maintained production dbt models for pharmaceutical Chemistry, Manufacturing & Controls (CMC) data, translating complex scientist requirements into governed, auditable transformations.

**100% GxP Lineage** Regulatory Traceability

**40+ Pipelines** Scientist Formula Models

Snowflake dbt

Data Governance Lineage

SYSTEM 05 • PySpark & Distributed

## End-to-End HR Analytics & Historical Snapshot Engine

Unified Workforce Lifecycle & Temporal Trend Intelligence

Designed a unified pipeline tracking headcount, attrition, L&D, recruitment, and manpower cost. Diagnosed a snapshot-only data model blocking YoY/SPLY trend reporting and implemented historical snapshot accumulation while resolving schema-inference ingestion bugs.

**Enabled 5-Yr History** YoY Reporting Capability

**Zero Schema Errors** Ingestion Drift Failures

Databricks PySpark

REST APIs Power BI

SYSTEM 06 • PySpark & Distributed

## Automated Steel-Rate Variance & Settlement Pipeline

SIAM Index Integration & Automotive Price Reconciliation

Integrated external SIAM steel-rate indices with internal procurement data for an automotive manufacturing client to automate price-variance analysis and customer settlement calculations.

**3 Weeks → 1 Day** Settlement Cycle Time

**99.98%** Reconciliation Accuracy

Databricks PySpark SQL

External APIs

# CAREER HISTORY

## Ernst & Young (EY)

Sep 2024 – Present • Mumbai, MH, India

🎗 🏆 **Award: EY Client Extraordinaire**

### Consultant — Data Analytics / Engineering

Lead data engineering and risk analytics initiatives across global pharmaceutical, automotive manufacturing, and agrochemical enterprise clients.

- Spearheaded enterprise PySpark pipelines processing tens of millions of ERP transaction records for audit exception detection.
- Designed governed Snowflake and dbt architectures, cutting warehouse costs by 62% and eliminating runtime join bottlenecks.
- Architected generative AI RAG workflows extracting Key Risk Indicators (KRIs) from compliance documentation with 98%+ precision.
- Honored with the EY Client Extraordinaire award for exceptional delivery and measurable client impact.

Stack: PySpark Snowflake dbt Databricks LangChain Azure OpenAI SAP Data SQL

## Square Yards

Oct 2023 – Sep 2024 • Mumbai, MH, India

### Data Engineer

Engineered high-scale data analytics pipelines for property pricing indices, mortgage financing, and consumer search behavior across major metropolitan markets.

- Developed distributed Scala data pipelines aggregating millions of real estate listings, pricing tiers, and mortgage rate streams.
- Built reusable data widgets and API endpoints powering customer-facing analytical dashboards and loan eligibility engines.
- Optimized aggregation queries and partition strategies, reducing dashboard latency across top 10 Indian property markets.

Stack: Scala Apache Spark SQL REST APIs PostgreSQL Data Warehousing

## Larsen & Toubro Infotech (LTI)

Jun 2022 – Jan 2023 • Mumbai, MH, India

### Engineer — Cloud and Infrastructure

Engineered cloud infrastructure operations, automation scripts, and server maintenance for enterprise IT environments.

- Managed cloud infrastructure provisioning, virtual machine lifecycle, and backup automation across enterprise environments.
- Maintained enterprise monitoring, incident remediation, and CI/CD operations upholding high availability SLAs.
- Formed foundational enterprise computing disciplines in distributed operating systems and networking.

Stack: Cloud Infrastructure Linux / Unix Networking Automation CI/CD

# TOOLS & PLATFORMS

Official production technologies, cloud engines, and distributed frameworks used daily in enterprise risk detection and data warehouse architectures.

**Snowflake**
Cloud Warehouse
Data Cloud & Modeling

**Databricks** CERTIFIED
Lakehouse Engine
PySpark & GenAI

**PySpark / Spark**
Distributed Compute
45M+ Tx Exception Engine

**dbt Labs**
Transformation
Incremental Marts & Tests

**Python**
Core Language
Data Science & Automation

**LangChain & RAG**
Generative AI
KRI PDF Extraction & FAISS

### Microsoft Azure
Cloud Platform
OpenAI, Blob & VMs

### Google BigQuery
Cloud Analytics
Serverless SQL Warehouse

### Power BI
Business Intelligence
Executive KPI Dashboards

### SQL & Relational
Database Architecture
MS SQL Server, MySQL

### MongoDB
Document Store
NoSQL Schemas & APIs

### Scala
Distributed Language
Apache Spark Data Pipelines

# HONORS & CREDENTIALS

OFFICIAL CERTIFICATION

### Databricks Certified Generative AI Engineer Associate

Databricks Inc. • Verified Credential

Demonstrates verified expertise in building, deploying, and evaluating production Generative AI applications on Databricks, including LLM fine-tuning, RAG system design, vector search, and MLflow governance.

EXCELLENCE RECOGNITION

### EY Client Extraordinaire Award

Ernst & Young (EY) • FY 2024 – 2025

Prestigious internal honor awarded for exceptional performance in delivering client-critical data engineering pipelines, resolving systemic query performance bottlenecks, and innovating enterprise risk analytics.

ACADEMIC FOUNDATION

Mar 2023 – Sep 2023
**Post Graduate Diploma in Big Data Analytics**

Aug 2018 – May 2022
**B.E. in Computer Engineering**

Jul 2016 – Feb 2018
**Higher Secondary Certificate (HSC) — Science**

Center for Development of Advanced Computing (C-DAC), Mumbai

A. C. Patil College of Engineering, Mumbai

Ramnarain Ruia Jr. College, Mumbai
